Questions for the CA

Please read with the sample files in this folder. Every file is a SAMPLE: fake names, fake numbers, made by the app's real invoice code. Nothing here is a real invoice.

How the money works, in four lines

1. A shop owner pays us for a plan (Growth Rs 2,999 or Pro Rs 4,999 a month, paid in advance). We add 18% GST on top.
2. Or the owner is on "Partner": no monthly price. He adds money to a wallet (GST on top) and we take Rs 3 to Rs 15 from it for each completed order.
3. If we send money back we make a credit note. If a bank takes money back from us (a chargeback) we also make a credit note.
4. We call wallet money our income only when it is used up as order fees. A top-up is only cash we hold until then.

The plan price

1. Is 18% GST right for our monthly plans, and which SAC code goes on the invoice?

2. We add GST on top of the price. Is that the right way to show it?

3. For 3 and 6 month plans we give a discount and charge GST on the reduced price. Is that correct?

4. If an owner pays months in advance, is GST due now or month by month?

The Partner wallet

5. The owner tops up Rs 500 and pays Rs 500 + 18% GST. Is it right to charge GST at top-up time?

6. We then take Rs 3 to Rs 15 from the wallet per order. Does that fee need GST, and what invoice does it need?

7. We count wallet money as our income only when it is used up. Is that the right way to show profit?

Refunds

8. When we refund a plan or wallet top-up we make a credit note. Is that the right form and timing?

9. Do we get the GST back when we refund?

10. If a bank takes money back (a chargeback), what do we record?

11. Our rule is "no refunds except mistakes". Is that fine for GST and consumer law?

Other cases

12. Is a coupon a discount before GST, or something else?

13. We give free days at the start. Does a free period need any invoice or GST?

14. Sometimes the owner pays us directly by bank or UPI and we record it. Is the invoice timing right?

15. Do we need e-invoicing (IRN/QR) at our size, and from what turnover?

16. Our invoice numbers look like PLN/2026-27/0001 (plans), TOP/2026-27/0001 (top-ups) and CN/2026-27/0001 (credit notes). Is that fine?

17. Do any GST or TCS duties fall on us when customers order from each shop's own app?

18. How should your share and Vivek's share of the money be recorded?

The files in this folder

01-plan-invoice-same-state.pdf	Plan invoice, shop in the same state (CGST + SGST)
02-plan-invoice-other-state.pdf	Plan invoice, shop in another state (IGST)
03-plan-invoice-with-discount.pdf	Plan invoice with the 6 month discount (GST on the discounted price)
04-plan-invoice-wallet-balance-used.pdf	Plan invoice where an old Partner wallet balance of Rs 400 was adjusted (GST already paid on it)
05-plan-invoice-paid-outside-the-app.pdf	Plan invoice for a payment received outside the app (bank transfer, recorded by the admin)
06-partner-wallet-top-up-invoice.pdf	Partner wallet top-up of Rs 500 with GST on top

07-sms-top-up-invoice.pdf	SMS balance top-up of Rs 200 with GST on top
08-credit-note-plan-refund.pdf	Credit note: Rs 2,000 sent back for the unused part of a plan
09-credit-note-wallet-refund.pdf	Credit note: Rs 354 sent back for unused wallet money (Rs 300 + GST)
10-credit-note-lost-bank-dispute.pdf	Credit note: the bank took Rs 590 back (a chargeback the platform lost)
11-gst-register-sample.xlsx	The month's GST register with all of the above. The credit notes are minus rows.

Also for a lawyer (not the CA)

The Terms of Service and the Privacy Policy, the "no refund" wording, and the agreement between Ankit and Vivek.
